Activity– Problem Solving

<https://whiterosemaths.com/homelearning/year-6/> - follow the link to today's learning. We are on Summer 1 – Week 7 – Lesson 2 – Forming Expressions

Some things to remember today:

- REMEMBER when we write out expressions or algebra if the number and the letter are right next to each other e.g. $4a$ then it means that we multiply so this would be $4 \times a$.
- The PERIMETER of a shape is the length of the outside edge so if you walked around the outside of a shape, how far would it be.
